1985 *Journal of Guidance, Control, and Dynamics* Index

How to Use the Index

In the Subject Index, pages 790-794, each technical paper is listed under a maximum of three appropriate headings. Note the number in boldface type following each paper title, and use that number to locate the paper in the Chronological Index. The Author Index, page 795, lists all authors associated with a given technical paper. The locating numbers are identical to those in the Subject Index. The Chronological Index, pages 796-800, lists all papers by their unique code numbers. This listing contains titles, authors and their affiliations, and volume, issue number, and page where the paper appeared. It also gives the AIAA paper number, if any, on which the article was based, as well as the "CP" or conference volume number if the paper was published in a bound collection of meetings papers. Comments, Replies, and Errata are listed directly beneath the paper to which they refer. If the paper to which they refer was published prior to 1985, that paper also will appear in both the Subject and Chronological Indexes. Authors of Cominents also are listed in the Author Index.

Subject Index

Aircraft Technology, Conventional, STOL/VTOL

Aerodynamics

Separation of Time Scales in Aircraft Trajectory Optimization **G85-046**

Aeroelasticity

A Multiloop Robust Controller Design Study Using Singular Value Gradients **G85-007**
Active Flutter Suppression Using Eigenspace and Linear Quadratic Design Techniques **G85-054**

Avionics Systems

Use of Multiple Inertial Systems to Correct for the Effects of Gravitational Anomalies **G85-075**

Cabin Environment, Crew Training, and Life Support

Optimal Catapult Impulse Shaping for Ejection Seats **G85-112**

Civil Missions and Transportation

Mixing Four-Dimensional Equipped and Unequipped Aircraft in the Terminal Area **G85-053**

Flight Displays

Predictor Laws for Pictorial Flight Displays **G85-096**

Flight Operations

Analysis of Aircraft Control Strategies for Microburst Encounter **G85-097**
Eccentric Two-Target Model for Qualitative Air Combat Game Analysis **G85-057**
Onboard Near-Optimal Climb-Dash Energy Management **G85-056**
Development of the F/A-18A Automatic Carrier Landing System **G85-052**
Four-Dimensional Fuel-Optimal Guidance in the Presence of Winds **G85-003**
Zeroth-Order Feedback Strategies for Medium-Range Interception in a Horizontal Plane **G85-002**

Ground Effect Machines

Aerodynamic Requirements at the Indianapolis Motor Speedway **G85-090**

Guidance and Control

Collaborative Techniques in Modal Analysis **G85-131**
Selection of an Optimal Cost Index for Airline Hub Operation **G85-130**
Ground-Simulation Investigation of VTOL Airworthiness Criteria for Terminal Area Operations **G85-128**
Two-Time Scale Stabilization of Systems with Output Feedback **G85-124**
Sensor Failure Detection for Jet Engines Using Analytical Redundancy **G85-117**
Controllability and Observability of General Linear Lumped-Parameter Systems **G85-116**
Optimal Catapult Impulse Shaping for Ejection Seats **G85-112**
Minimum-Fuel, Three-Dimensional Flight Paths for Jet Transports **G85-111**
Design of Robust Digital Controllers for Gas Turbines with Actuator and Sensor Dynamics **G85-110**
Application of a New Multivariable Model-Following Method to Decoupled Flight Control **G85-109**
Distributed Piezoelectric-Polymer Active Vibration Control of a Cantilever Beam **G85-105**
Analysis of Aircraft Control Strategies for Microburst Encounter **G85-097**
Predictor Laws for Pictorial Flight Displays **G85-096**
Slow and Fast State Variables for Three-Dimensional Flight Dynamics **G85-091**
Time-Domain Stability Robustness Measures for Linear Regulators **G85-088**
Use of Multiple Inertial Systems to Correct for the Effects of Gravitational Anomalies **G85-075**
New Concepts in Control Theory, 1959-1984 **G85-074**
Reliability Considerations in the Placement of Control System Components **G85-072**
Use of Frequency Dependence in Linear Quadratic Control Problems to Frequency-Shape Robustness **G85-067**
Onboard Near-Optimal Climb-Dash Energy Management **G85-056**
Optimal Symmetric Flight with an Intermediate Vehicle Model **G85-055**
Active Flutter Suppression Using Eigenspace and Linear Quadratic Design Techniques **G85-054**
Mixing Four-Dimensional Equipped and Unequipped Aircraft in the Terminal Area **G85-053**
Development of the F/A-18A Automatic Carrier Landing System **G85-052**
Least Acceleration Motion for Given Terminal Conditions **G85-045**
An Investigation of Correlation Region in Maneuvering Multi-Target Tracking **G85-041**
Adaptive Modal Control of Structural Dynamic Systems Using Recursive Lattice Filters **G85-037**
Design and Flight Testing of Digital Direct Side-Force Control Laws **G85-032**
A Design Methodology for Pitch Pointing Flight Control Systems **G85-031**
Nonconservative Evaluation of Uniform Stability Margins of Multivariable Feedback Systems **G85-029**
To Pursue or to Evade - That is the Question **G85-028**
Stability Analysis of Gyroscopic Systems by Matrix Methods **G85-024**
Isochromes for Maximum Endurance Horizontal Gliding Flight **G85-023**
Modeling of Certain Strapdown Heading-Sensitive Errors in INS Error Models **G85-020**
A Fault-Tolerant Approach to Helicopter Swashplate Control **G85-010**
Pilot Modeling and Closed-Loop Analysis of Flexible Aircraft in the Pitch Tracking Task **G85-009**
Decoupling of High-Gain Multivariable Tracking Systems **G85-007**
Closed-Form Solutions for Feedback Control with Terminal Constraints **G85-006**
Periodic Optimal Cruise of an Atmospheric Vehicle **G85-005**

1985 *Journal of Guidance, Control, and Dynamics* Index

How to Use the Index

In the Subject Index, pages 790-794, each technical paper is listed under a maximum of three appropriate headings. Note the number in boldface type following each paper title, and use that number to locate the paper in the Chronological Index. The Author Index, page 795, lists all authors associated with a given technical paper. The locating numbers are identical to those in the Subject Index. The Chronological Index, pages 796-800, lists all papers by their unique code numbers. This listing contains titles, authors and their affiliations, and volume, issue number, and page where the paper appeared. Subject Index

Aircraft Technology, Conventional, STOL/VTOL

Aerodynamics

Separation of Time Scales in Aircraft Trajectory Optimization **G85-046**

Aeroelasticity

A Multiloop Robust Controller Design Study Using Singular Value Gradients **G85-007**
Active Flutter Suppression Using Eigenspace and Linear Quadratic Design Techniques **G85-054**

Avionics Systems

Use of Multiple Inertial Systems to Correct for the Effects of Gravitational Anomalies **G85-075**

Cabin Environment, Crew Training, and Life Support

Optimal Catapult Impulse Shaping for Ejection Seats **G85-112**

Civil Missions and Transportation

Mixing Four-Dimensional Equipped and Unequipped Aircraft in the Terminal Area **G85-053**

Flight Displays

Predictor Laws for Pictorial Flight Displays **G85-096**

Flight Operations

Analysis of Aircraft Control Strategies for Microburst Encounter **G85-097**
Eccentric Two-Target Model for Qualitative Air Combat Game Analysis **G85-057**
Onboard Near-Optimal Climb-Dash Energy Management **G85-056**
Development of the F/A-18A Automatic Carrier Landing System **G85-052**
Four-Dimensional Fuel-Optimal Guidance in the Presence of Winds **G85-003**
Zeroth-Order Feedback Strategies for Medium-Range Interception in a Horizontal Plane **G85-002**

Ground Effect Machines

Aerodynamic Requirements at the Indianapolis Motor Speedway **G85-090**

Guidance and Control

Collaborative Techniques in Modal Analysis **G85-131**
Selection of an Optimal Cost Index for Airline Hub Operation **G85-130**
Ground-Simulation Investigation of VTOL Airworthiness Criteria for Terminal Area Operations **G85-128**
Two-Time Scale Stabilization of Systems with Output Feedback **G85-124**
Sensor Failure Detection for Jet Engines Using Analytical Redundancy **G85-117**
Controllability and Observability of General Linear Lumped-Parameter Systems **G85-116**
Optimal Catapult Impulse Shaping for Ejection Seats **G85-112**
Minimum-Fuel, Three-Dimensional Flight Paths for Jet Transports **G85-111**
Design of Robust Digital Controllers for Gas Turbines with Actuator and Sensor Dynamics **G85-110**
Application of a New Multivariable Model-Following Method to Decoupled Flight Control **G85-109**
Distributed Piezoelectric-Polymer Active Vibration Control of a Cantilever Beam **G85-105**
Analysis of Aircraft Control Strategies for Microburst Encounter **G85-097**
Predictor Laws for Pictorial Flight Displays **G85-096**
Slow and Fast State Variables for Three-Dimensional Flight Dynamics **G85-091**
Time-Domain Stability Robustness Measures for Linear Regulators **G85-088**
Use of Multiple Inertial Systems to Correct for the Effects of Gravitational Anomalies **G85-075**
New Concepts in Control Theory, 1959-1984 **G85-074**
Reliability Considerations in the Placement of Control System Components **G85-072**
Use of Frequency Dependence in Linear Quadratic Control Problems to Frequency-Shape Robustness **G85-067**
Onboard Near-Optimal Climb-Dash Energy Management **G85-056**
Optimal Symmetric Flight with an Intermediate Vehicle Model **G85-055**
Active Flutter Suppression Using Eigenspace and Linear Quadratic Design Techniques **G85-054**
Mixing Four-Dimensional Equipped and Unequipped Aircraft in the Terminal Area **G85-053**
Development of the F/A-18A Automatic Carrier Landing System **G85-052**
Least Acceleration Motion for Given Terminal Conditions **G85-045**
An Investigation of Correlation Region in Maneuvering Multi-Target Tracking **G85-041**
Adaptive Modal Control of Structural Dynamic Systems Using Recursive Lattice Filters **G85-037**
Design and Flight Testing of Digital Direct Side-Force Control Laws **G85-032**
A Design Methodology for Pitch Pointing Flight Control Systems **G85-031**
Nonconservative Evaluation of Uniform Stability Margins of Multivariable Feedback Systems **G85-029**
To Pursue or to Evade - That is the Question **G85-028**
Stability Analysis of Gyroscopic Systems by Matrix Methods **G85-024**
Isochromes for Maximum Endurance Horizontal Gliding Flight **G85-023**
Modeling of Certain Strapdown Heading-Sensitive Errors in INS Error Models **G85-020**
A Fault-Tolerant Approach to Helicopter Swashplate Control **G85-010**
Pilot Modeling and Closed-Loop Analysis of Flexible Aircraft in the Pitch Tracking Task **G85-009**
Decoupling of High-Gain Multivariable Tracking Systems **G85-007**
Closed-Form Solutions for Feedback Control with Terminal Constraints **G85-006**
Periodic Optimal Cruise of an Atmospheric Vehicle **G85-005**

Interception in Three Dimensions: An Energy Formulation G85-004
Four-Dimensional Fuel-Optimal Guidance in the Presence of Winds G85-003
Zeroth-Order Feedback Strategies for Medium-Range Interception in a Horizontal Plane G85-002
Optimal Guidance Law in the Plane G84-076

Handling Qualities, Stability and Control

Normalized Predictive Deconvolution: A Time Series Algorithm for Modeling Human Operator Dynamics G85-129
Ground-Simulation Investigation of VTOL Airworthiness Criteria for Terminal Area Operations G85-128
Stability and Control of VTOL Capable Airships in Hovering Flight G85-127
Longitudinal Stability of a Hovering, Tethered Rotorcraft G85-126
Application of a New Multivariable Model-Following Method to Decoupled Flight Control G85-109
Analysis of Aircraft Control Strategies for Microburst Encounter G85-097
Predictor Laws for Pictorial Flight Displays G85-096
Time-Domain Stability Robustness Measures for Linear Regulators G85-088
A Multiloop Robust Controller Design Study Using Singular Value Gradients G85-087
Toward a Unifying Theory for Aircraft Handling Qualities G85-077
A Nonlinear Pilot Model for Hover G85-058
Modal Analysis of Flexible Aircraft Dynamics with Handling Qualities Implications G85-033
Model Reduction of Control Systems G85-025
Pilot Modeling and Closed-Loop Analysis of Flexible Aircraft in the Pitch Tracking Task G85-009
Decoupling of High-Gain Multivariable Tracking Systems G85-007

Helicopters

Ground-Simulation Investigation of VTOL Airworthiness Criteria for Terminal Area Operations G85-128
Longitudinal Stability of a Hovering, Tethered Rotorcraft G85-126
A Nonlinear Pilot Model for Hover G85-058
A Fault-Tolerant Approach to Helicopter Swashplate Control G85-010

Landing Dynamics

A Nonlinear Pilot Model for Hover G85-058
Development of the F/A-18A Automatic Carrier Landing System G85-052

Lighter-than-Airships

Stability and Control of VTOL Capable Airships in Hovering Flight G85-127

Military Missions

Zeroth-Order Feedback Strategies for Medium-Range Interception in a Horizontal Plane G85-002

Navigation, Communication, and Traffic Control

Selection of an Optimal Cost Index for Airline Hub Operation G85-130
Strapdown Inertial Navigation System Requirements Imposed by Synthetic Aperture Radar G85-076
Use of Multiple Inertial Systems to Correct for the Effects of Gravitational Anomalies G85-075
Mixing Four-Dimensional Equipped and Unequipped Aircraft in the Terminal Area G85-053

Performance

Selection of an Optimal Cost Index for Airline Hub Operation G85-130
A Missile Duel Between Two Aircraft G85-086
Eccentric Two-Target Model for Qualitative Air Combat Game Analysis G85-057
Onboard Near-Optimal Climb-Dash Energy Management G85-056
Isochromes for Maximum Endurance Horizontal Gliding Flight G85-023
Periodic Optimal Cruise of an Atmospheric Vehicle G85-005
Interception in Three Dimensions: An Energy Formulation G85-004
Four-Dimensional Fuel-Optimal Guidance in the Presence of Winds G85-003

Simulation

Dynamic Analysis of Large-Scale Mechanical Systems and Animated Graphics G85-015
Optimal Guidance Law in the Plane G84-076

Structural Design (including Loads)

A Multiloop Robust Controller Design Study Using Singular Value Gradients G85-087
Dynamic Analysis of Large-Scale Mechanical Systems and Animated Graphics G85-015

Vibration

Controllability and Observability of General Linear Lumped-Parameter Systems G85-116
Distributed Piezoelectric-Polymer Active Vibration Control of a Cantilever Beam G85-105

Energy

Flywheels

Optimal Magnetic Bearing Control for High-Speed Momentum Wheels G85-125

Wind Power

Longitudinal Stability of a Hovering, Tethered Rotorcraft G85-126

Fluid Dynamics

Boundary Layers and Convective Heat Transfer-Laminar

A Relation Between Liquid Roll Moment and Liquid Side Moment G85-051

Viscous Nonboundary-Layer Flows

Measurements of Despin and Yawing Moments Produced by a Viscous Liquid G85-049

Wave Motion and Sloshing

Moment Induced by Liquid Payload During Spin-up Without a Critical Layer G85-061

Interdisciplinary Topics

Analytical and Numerical Methods

A New Algorithm for the Computation of the Geodetic Coordinates as a Function of Earth-Centered Earth-Fixed Coordinates G85-133
Two-Time Scale Stabilization of Systems with Output Feedback G85-124
Robust Natural Control of Distributed Systems G85-122
Dynamics and Control of Lattice Beams Using Simplified Finite Element Models G85-106
Stability of Multidimensional Linear Time-Varying Systems G85-101
Analytic Fourier Transform for a Class of Finite-Time Control Problems G85-094
Slow and Fast State Variables for Three-Dimensional Flight Dynamics G85-091
Applications of Nonlinear Programming for Automated Multivariable Control System Design G85-089
Subaliases in the Frequency Response of Digitally Controlled Systems G85-073
A Design Methodology for Pitch Pointing Flight Control Systems G85-031
The Enigma of False Bias Detection in a Strapdown System During Transfer Alignment G85-030
Model Reduction of Control Systems G85-025
An Analytic Solution for the State Trajectories of a Feedback Control System G85-022
Closed-Form Solutions for Feedback Control with Terminal Constraints G85-006
Periodic Optimal Cruise of an Atmospheric Vehicle G85-005
Interception in Three Dimensions: An Energy Formulation G85-004

Astrodynamics

Longitudinal Vibration of Gravity-Stabilized, Large, Damped Spacecraft Modeled as Elastic Continua G85-119
Effects of Payload Motions on the Nutational Stability of the Galileo Spacecraft G85-118
Characteristic Elastic Systems of Time-Limited Optimal Maneuvers G85-100
Low Earth Orbit Navigation in the Tracking and Data Acquisition System Era G85-082
Dynamics and Control of a Shuttle-Attached Antenna Experiment G85-060
Computerized Generation of Symbolic Equations of Motion for Spacecraft G85-050
Application of the Delta-Rho Perturbation Method to Autonomous Orbit Computation G85-040
Formationkeeping for a Pair of Satellites in a Circular Orbit G85-039
Shuttle-Tethered Subsatellite System Stability with a Flexible Massive Tether G85-038
Flexural Vibration of Gravity-Stabilized, Structurally Damped, Large Flexible Satellites G85-036

Optimal Many-Revolution Orbit Transfer G85-026
A Second-Order Solution of the Main Problem of Artificial Satellites Using Multiple Scales G85-018

Celestial Mechanics

A Second-Order Solution of the Main Problem of Artificial Satellites Using Multiple Scales G85-018

Computer Technology

Subaliases in the Frequency Response of Digitally Controlled Systems G85-073

Human Factors

Optimal Catapult Impulse Shaping for Ejection Seats G85-112
Toward a Unifying Theory for Aircraft Handling Qualities G85-077
A Visual Cueing Model for Terrain-Following Applications G85-034
Pilot Modeling and Closed-Loop Analysis of Flexible Aircraft in the Pitch Tracking Task G85-009

Numerical Analysis

Application of the Delta-Rho Perturbation Method to Autonomous Orbit Computation G85-040

Reliability, Maintainability, and Logistics Support

A Fault-Tolerant Approach to Helicopter Swashplate Control G85-010

Sensor Systems

Strapdown Inertial Navigation System Requirements Imposed by Synthetic Aperture Radar G85-076

State Estimation

A Visual Cueing Model for Terrain-Following Applications G85-034

System Identification

Normalized Predictive Deconvolution: A Time Series Algorithm for Modeling Human Operator Dynamics G85-129
An Eigensystem Realization Algorithm for Modal Parameter Identification and Model Reduction G85-107
Identification of Vibrating Flexible Structures G85-080
Estimation of the Time-to-Go Parameter for Air-to-Air Missiles G85-043

Launch Vehicle and Missile (LV/M) Technology

Aerodynamics

Angular Motion Influence on Re-entry Vehicle Ablation or Erosion Asymmetry Formation G85-048

Dynamics and Control

Reducing the Effects of Model Reduction due to Parameter Variations G85-132
Eigenvalue Optimization Algorithms for Structure/Controller Design Iterations G85-120
Guidance Performance Analysis with In-Flight Radome Error Calibration G85-115
Miss Distance of Proportional Navigation Missile with Varying Velocity G85-114
Absolute Stability of Symmetric Highly Maneuverable Missiles G85-113
Design of Robust Digital Controllers for Gas Turbines with Actuator and Sensor Dynamics G85-110
An Eigensystem Realization Algorithm for Modal Parameter Identification and Model Reduction G85-107
Applications of Nonlinear Programming for Automated Multivariable Control System Design G85-089
A Missile Duel Between Two Aircraft G85-086
Robust Missile Autopilot Design Using a Generalized Singular Optimal Control Technique G85-085
Maximum-Information Guidance for Homing Missiles G85-084
Optimal Controller for Homing Missile G85-071
A New Guidance Law for Homing Missiles G85-068
Moment Induced by Liquid Payload During Spin-up Without a Critical Layer G85-061
A Relation Between Liquid Roll Moment and Liquid Side Moment G85-051
Measurements of Despin and Yawing Moments Produced by a Viscous Liquid G85-049
Angular Motion Influence on Re-entry Vehicle Ablation or Erosion Asymmetry Formation G85-048
Status and Concerns for Bank-to-Turn Control of Tactical Missiles G85-044
Estimation of the Time-to-Go Parameter for Air-to-Air Missiles G85-043
Digital Homing Guidance--Stability vs Performance Tradeoffs G85-042
Nonconservative Evaluation of Uniform Stability Margins of Multivariable Feedback Systems G85-029
The Number of Multiplications Required to Chain Coordinate Transformations G85-027
A Frequency Domain Stability Analysis of a Phase Plane Control System G85-008
Line-of-Sight Reconstruction for Faster Homing Guidance G85-001

Guidance

Guidance Performance Analysis with In-Flight Radome Error Calibration G85-115
Miss Distance of Proportional Navigation Missile with Varying Velocity G85-114
Robust Missile Autopilot Design Using a Generalized Singular Optimal Control Technique G85-085
Maximum-Information Guidance for Homing Missiles G85-084
Optimal Controller for Homing Missile G85-071
A New Guidance Law for Homing Missiles G85-068
Flight Analysis for a Two-Stage Launch Vehicle with a Glideback Booster G85-059
Least Acceleration Motion for Given Terminal Conditions G85-045
Estimation of the Time-to-Go Parameter for Air-to-Air Missiles G85-043
Digital Homing Guidance--Stability vs Performance Tradeoffs G85-042
The Enigma of False Bias Detection in a Strapdown System During Transfer Alignment G85-030
The Number of Multiplications Required to Chain Coordinate Transformations G85-027
The General Class of Optimal Proportional Navigation G85-021
Modeling of Certain Strapdown Heading-Sensitive Errors in INS Error Models G85-020
Line-of-Sight Reconstruction for Faster Homing Guidance G85-001

Launch Vehicle Systems

Flight Analysis for a Two-Stage Launch Vehicle with a Glideback Booster G85-059
The General Class of Optimal Proportional Navigation G85-021

Missile Systems

Reducing the Effects of Model Reduction due to Parameter Variations G85-132
Absolute Stability of Symmetric Highly Maneuverable Missiles G85-113
A New Guidance Law for Homing Missiles G85-068
Status and Concerns for Bank-to-Turn Control of Tactical Missiles G85-044
Digital Homing Guidance--Stability vs Performance Tradeoffs G85-042
An Investigation of Correlation Region in Maneuvering Multi-Target Tracking G85-041
The General Class of Optimal Proportional Navigation G85-021
Line-of-Sight Reconstruction for Faster Homing Guidance G85-001

Sounding Rocket Systems

Trajectory Reconstruction During Thrusting Phase of Rockets Using Differential Corrections G85-070

Testing, Flight and Ground

The Enigma of False Bias Detection in a Strapdown System During Transfer Alignment G85-030

Trajectories and Tracking Systems

Guidance Performance Analysis with In-Flight Radome Error Calibration G85-115
Miss Distance of Proportional Navigation Missile with Varying Velocity G85-114
A Missile Duel Between Two Aircraft G85-086
Robust Missile Autopilot Design Using a Generalized Singular Optimal Control Technique G85-085
Optimal Controller for Homing Missile G85-071
Trajectory Reconstruction During Thrusting Phase of Rockets Using Differential Corrections G85-070
Flight Analysis for a Two-Stage Launch Vehicle with a Glideback Booster G85-059
An Investigation of Correlation Region in Maneuvering Multi-Target Tracking G85-041
Decoupling of High-Gain Multivariable Tracking Systems G85-007

Vibration

Stochastic Response Analysis, Order Reduction, and Output Feedback Controllers for Flexible Spacecraft G85-014

Propulsion

Airbreathing Propulsion

Sensor Failure Detection for Jet Engines Using Analytical Redundancy G85-117

Electric and Advanced Space Propulsion

Inclination Correction for Geostationary Orbits Using Ion Thrusters G85-069

Engine Control

Sensor Failure Detection for Jet Engines Using Analytical Redundancy G85-117
Design of Robust Digital Controllers for Gas Turbines with Actuator and Sensor Dynamics G85-110

Liquid Rocket Engines and Missile Systems

Thrust Vector Control Design for a Liquid Upper Stage Spacecraft G85-099

Spacecraft Technology

Attitude Determination

Star-Sensor-Based Satellite Attitude/Attitude Rate Estimator G85-098
Equations of Attitude Motion for an N-Body Satellite with Moving Joints G85-093
Attitude Stability of Dual-Spin Spacecraft with Unsymmetrical Bodies G85-016
Antenna Pointing Systems for Large Communications Satellites G85-011

Configurational and Structural Design (including Loads)

Eigenvalue Optimization Algorithms for Structure/Controller Design Iterations G85-120
Space Structure Control Design by Variance Assignment G85-079
Computerized Generation of Symbolic Equations of Motion for Spacecraft G85-050
Optimal Simultaneous Structural and Control Design of Maneuvering Flexible Spacecraft G85-013

Dynamics and Control

Optimal Magnetic Bearing Control for High-Speed Momentum Wheels G85-125
Two-Time Scale Stabilization of Systems with Output Feedback G85-124
The Implementation of Modal Filters for Control of Structures G85-121
Longitudinal Vibration of Gravity-Stabilized, Large, Damped Spacecraft Modeled as Elastic Continua G85-119
Effects of Payload Motions on the Nutational Stability of the Galileo Spacecraft G85-118
Characteristic Elastic Systems of Time-Limited Optimal Maneuvers G85-108
Dynamics and Control of Lattice Beams Using Simplified Finite Element Models G85-106
Distributed Piezoelectric-Polymer Active Vibration Control of a Cantilever Beam G85-105
Experimental Research on Flexible Beam Modal Control G85-104
Dynamics and Control of Orbiting Flexible Structures Exposed to Solar Radiation G85-103
Dynamics of Flexible Bodies in Tree Topology--A Computer-Oriented Approach G85-102
Stability of Multidimensional Linear Time-Varying Systems G85-101
Attitude Stability of an Orbiting Gyrostat in Conical Equilibrium G85-100
Thrust Vector Control Design for a Liquid Upper Stage Spacecraft G85-099
Star-Sensor-Based Satellite Attitude/Attitude Rate Estimator G85-098
Equations of Attitude Motion for an N-Body Satellite with Moving Joints G85-093
Applications of Nonlinear Programming for Automated Multivariable Control System Design G85-089
Minimum Energy-Loss Guidance for Aeroassisted Orbital Plane Change G85-083
Attitude Dynamics of a Rotating Chain of Rigid Bodies in a Gravitational Field G85-081
Space Structure Control Design by Variance Assignment G85-079
Roll/Yaw Control of a Flexible Spacecraft Using Skewed Bias Momentum Wheels G85-078
New Concepts in Control Theory, 1959-1984 G85-074
Reliability Considerations in the Placement of Control System Components G85-072
Use of Frequency Dependence in Linear Quadratic Control Problems to Frequency-Shape Robustness G85-067
Preliminary Orbit Determination by a Composite Multivariate Search Strategy G85-066
Development of Dynamics and Control Simulation of Large Flexible Space Systems G85-064
Modal-Space Active Damping of a Plane Grid: Experiment and Theory G85-063
Quaternion Feedback for Spacecraft Large Angle Maneuvers G85-062
Dynamics and Control of a Shuttle-Attached Antenna Experiment G85-060
Computerized Generation of Symbolic Equations of Motion for Spacecraft G85-050
Least Acceleration Motion for Given Terminal Conditions G85-045
Formationkeeping for a Pair of Satellites in a Circular Orbit G85-039
Shuttle-Tethered Subsatellite System Stability with a Flexible Massive Tether G85-038
Adaptive Modal Control of Structural Dynamic Systems Using Recursive Lattice Filters G85-037
Flexural Vibration of Gravity-Stabilized, Structurally Damped, Large Flexible Satellites G85-036
Poles and Transmission Zeros of Flexible Spacecraft Control Systems G85-035
The Number of Multiplications Required to Chain Coordinate Transformations G85-027
Model Reduction of Control Systems G85-025
An Analytic Solution for the State Trajectories of a Feedback Control System G85-022
Attitude Stability of Dual-Spin Spacecraft with Unsymmetrical Bodies G85-016
Stochastic Response Analysis, Order Reduction, and Output Feedback Controllers for Flexible Spacecraft G85-014
Optimal Simultaneous Structural and Control Design of Maneuvering Flexible Spacecraft G85-013
High Precision Active Nutation Control of a Momentum Biased Spacecraft with Flexible Appendages G85-012
Antenna Pointing Systems for Large Communications Satellites G85-011
Closed-Form Solutions for Feedback Control with Terminal Constraints G85-006
Fuel-Optimal Maneuvers of a Spacecraft Relative to a Point in Circular Orbit G84-118

Earth-Orbital Trajectories

A New Algorithm for the Compuation of the Geodetic Coordinates as a Function of Earth-Centered Earth-Fixed Coordinates G85-133
Three- and Four-Satellite Continuous-Coverage Constellations G85-123
Application of the Delta-Rho Perturbation Method to Autonomous Orbit Computation G85-040
Formationkeeping for a Pair of Satellites in a Circular Orbit G85-039
Optimal Many-Revolution Orbit Transfer G85-026
A Second-Order Solution of the Main Problem of Artificial Satellites Using Multiple Scales G85-018
Intercept Probability of Satellites in Circular Orbits G85-017
Fuel-Optimal Maneuvers of a Spacecraft Relative to a Point in Circular Orbit G84-118

Entry Vehicle Guidance

Minimum Energy-Loss Guidance for Aeroassisted Orbital Plane Change G85-083
Minimum-Fuel Aeroassisted Coplanar Orbit Transfer Using Lift-Modulation G85-019

Entry Vehicle Mission Studies and Flight Mechanics

Minimum-Fuel Aeroassisted Coplanar Orbit Transfer Using Lift-Modulation G85-019

Mission Analysis

Three- and Four-Satellite Continuous-Coverage Constellations G85-123
An Analytical Approach to Geosynchronous Acquisition G85-092
Intercept Probability of Satellites in Circular Orbits G85-017

Missions and Economics

Three- and Four-Satellite Continuous-Coverage Constellations G85-123

Navigation, Guidance, and Flight-Path Control

An Analytical Approach to Geosynchronous Acquisition G85-092
Minimum Energy-Loss Guidance for Aeroassisted Orbital Plane Change G85-083
Low Earth Orbit Navigation in the Tracking and Data Acquisition System Era G85-082
New Concepts in Control Theory, 1959-1984 G85-074
Preliminary Orbit Determination by a Composite Multivariate Search Strategy G85-066
Error Analyses for the Delivery of a Spinning Probe to Jupiter G85-065
Optimal Symmetric Flight with an Intermediate Vehicle Model G85-055
Optimal Many-Revolution Orbit Transfer G85-026
An Analytic Solution for the State Trajectories of a Feedback Control System G85-022

Modeling of Certain Strapdown Heading-Sensitive Errors in INS Error Models G85-020
Minimum-Fuel Aeroassisted Coplanar Orbit Transfer Using Lift-Modulation G85-019

Simulation

Preliminary Orbit Determination by a Composite Multivariate Search Strategy G85-066
Development of Dynamics and Control Simulation of Large Flexible Space Systems G85-064
Optimal Finite Horizon Approximation of Unstable Linear Systems G85-047

Systems

Star-Sensor-Based Satellite Attitude/Attitude Rate Estimator G85-098
Low Earth Orbit Navigation in the Tracking and Data Acquisition System Era G85-082

Testing, Flight and Ground

An Eigensystem Realization Algorithm for Modal Parameter Identification and Model Reduction G85-107
Identification of Vibrating Flexible Structures G85-080

Structural Mechanics and Materials

Structural Design

Collaborative Techniques in Modal Analysis G85-131
Reliability Considerations in the Placement of Control System Components G85-072
Optimal Simultaneous Structural and Control Design of Maneuvering Flexible Spacecraft G85-013

Structural Dynamics

Collaborative Techniques in Modal Analysis G85-131
Robust Natural Control of Distributed Systems G85-122
The Implementation of Modal Filters for Control of Structures G85-121
Eigenvalue Optimization Algorithms for Structure/Controller Design Iterations G85-120
Longitudinal Vibration of Gravity-Stabilized, Large, Damped Spacecraft Modeled as Elastic Continua G85-119
Controllability and Observability of General Linear Lumped-Parameter Systems G85-116
Characteristic Elastic Systems of Time-Limited Optimal Maneuvers G85-108
Dynamics and Control of Lattice Beams Using Simplified Finite Element Models G85-106
Dynamics and Control of Orbiting Flexible Structures Exposed to Solar Radiation G85-103
Dynamics of Flexible Bodies in Tree Topology--A Computer-Oriented Approach G85-102
Stability of Multidimensional Linear Time-Varying Systems G85-101
A Robust Compensator Design by Frequency-Shaped Estimation G85-095
Identification of Vibrating Flexible Structures G85-080
Strapdown Inertial Navigation System Requirements Imposed by Synthetic Aperture Radar G85-076
Development of Dynamics and Control Simulation of Large Flexible Space Systems G85-064
Modal-Space Active Damping of a Plane Grid: Experiment and Theory G85-063
Dynamics and Control of a Shuttle-Attached Antenna Experiment G85-060
Optimal Finite Horizon Approximation of Unstable Linear Systems G85-047
Shuttle-Tethered Subsatellite System Stability with a Flexible Massive Tether G85-038
Flexural Vibration of Gravity-Stabilized, Structurally Damped, Large Flexible Satellites G85-036
Modal Analysis of Flexible Aircraft Dynamics with Handling Qualities Implications G85-033
Stochastic Response Analysis, Order Reduction, and Output Feedback Controllers for Flexible Spacecraft G85-014
High Precision Active Nutation Control of a Momentum Biased Spacecraft with Flexible Appendages G85-012

Chronological Index

G84-076 Optimal Guidance Law in the Plane. M. Guelman, *Laboratoire d'Automatique Theorique (France)*; and J. Shinar, *Technion--Israel Institute of Technology* (7, 4, p. 471) Article
Errata (8, 1, p. 160)

G84-118 Fuel-Optimal Maneuvers of a Spacecraft Relative to a Point in Circular Orbit. Thomas F. Carter, *Eastern Connecticut State University* (7, 6, p. 710) Article
Errata (8, 6, p. 789)

G85-001 Line-of-Sight Reconstruction for Faster Homing Guidance. F. William Nesline and Paul Zarchan, *Raytheon Company* (8, 1, p. 3) Article based on AIAA Paper 83-2170 CP836

G85-002 Zeroth-Order Feedback Strategies for Medium-Range Interception in a Horizontal Plane. J. Shinar, *Technion-Israel Institute of Technology* (8, 1, p. 9) Article

G85-003 Four-Dimensional Fuel-Optimal Guidance in the Presence of Winds. Abhijit Chakravarty, *Boeing Commercial Airplane Company* (8, 1, p. 16) Article based on AIAA Paper 83-2242 CP836

G85-004 Interception in Three Dimensions: An Energy Formulation. N. Rajan, *Stanford University*; and M. D. Ardema, *NASA Ames Research Center* (8, 1, p. 23) Article based on AIAA Paper 83-2121

G85-005 Periodic Optimal Cruise of an Atmospheric Vehicle. Jason L. Speyer, David Dannemiller and David Walker, *University of Texas at Austin* (8, 1, p. 31) Article

G85-006 Closed-Form Solutions for Feedback Control with Terminal Constraints. Jer-Nan Juang, *NASA Langley Research Center*; James D. Turner and Hon M. Chun, *Charles Stark Draper Laboratory, Inc.* (8, 1, p. 39) Article

G85-007 Decoupling of High-Gain Multivariable Tracking Systems. D. Brett Ridgely and Siva S. Banda, *U. S. Air Force Flight Dynamics Laboratory*; and John J. D'Azzo, *Air Force Institute of Technology* (8, 1, p. 44) Article based on AIAA Paper 83-0280

G85-008 A Frequency Domain Stability Analysis of a Phase Plane Control System. Alexander N. Penchuk and Philip D. Hattis, *Charles Stark Draper Laboratory, Inc.*; and Edward T. Kubiak, *NASA Johnson Space Center* (8, 1, p. 50) Article

G85-009 Pilot Modeling and Closed-Loop Analysis of Flexible Aircraft in the Pitch Tracking Task. David K. Schmidt, *Purdue University* (8, 1, p. 56) Article based on AIAA Paper 83-2231 CP836

G85-010 A Fault-Tolerant Approach to Helicopter Swashplate Control. Bruce K. Walker, *Massachusetts Institute of Technology*; Eliezer Gai and Mukund N. Desai, *Charles Stark Draper Laboratory, Inc.* (8, 1, p. 62) Article

G85-011 Antenna Pointing Systems for Large Communications Satellites. J. Broquet, B. Claudinon and A. Bousquet, *Matra Space Branch (France)* (8, 1, p. 71) Article based on AIAA Paper 82-0444 CP821

G85-012 High Precision Active Nutation Control of a Momentum Biased Spacecraft with Flexible Appendages. R. A. Laskin and E. H. Kopf, *Jet Propulsion Laboratory, California Institute of Technology* (8, 1, p. 78) Article based on AIAA Paper 83-330

G85-013 Optimal Simultaneous Structural and Control Design of Maneuvering Flexible Spacecraft. Arthur L. Hale, Ronald J. Lisowski and Wayne E. Dahl, *University of Illinois at Urbana-Champaign* (8, 1, p. 86) Article

G85-014 Stochastic Response Analysis, Order Reduction, and Output Feedback Controllers for Flexible Spacecraft. Hari B. Hablani, *Rockwell International* (8, 1, p. 94) Article based on

G85-015 Dynamic Analysis of Large-Scale Mechanical Systems and Animated Graphics. Parviz E. Nikravesh, *University of Iowa* (8, 1, p. 104) Article based on AIAA Paper 83-0946 CP832

G85-016 Attitude Stability of Dual-Spin Spacecraft with Unsymmetrical Bodies. Michael S. Lukich, *TRW Electronics and Defense*; and D. Lewis Mingori, *University of California, Los Angeles* (8, 1, p. 110) Article

G85-017 Intercept Probability of Satellites in Circular Orbits. Raymond M. Zazworsky, *Air Force Weapons Laboratory, Kirtland Air Force Base* (8, 1, p. 118) Article

G85-018 A Second-Order Solution of the Main Problem of Artificial Satellites Using Multiple Scales. Ahmed Kamel and Thierry Duhamel, *Ford Aerospace and Communications Corporation* (8, 1, p. 125) Article based on AIAA Paper 82-1408

G85-019 Minimum-Fuel Aeroassisted Coplanar Orbit Transfer Using Lift-Modulation. Kenneth D. Mease, *Jet Propulsion Laboratory, California Institute of Technology*; and Nguyen X. Vinh, *University of Michigan* (8, 1, p. 134) Article based on AIAA Paper 83-2094

G85-020 Modeling of Certain Strapdown Heading-Sensitive Errors in INS Error Models. Itzhack Y. Bar-Itzhack, *Technion-Israel Institute of Technology* (8, 1, p. 142) Engineering Note

G85-021 The General Class of Optimal Proportional Navigation. Wolfgang Pfleghaar, *Messerschmitt-Boelkow-Blohm* (8, 1, p. 144) Engineering Note

G85-022 An Analytic Solution for the State Trajectories of a Feedback Control System. James D. Turner and Hon M. Chun, *Charles Stark Draper Laboratory, Inc.*; and Jer-Nan Juang, *NASA Langley Research Center* (8, 1, p. 147) Engineering Note

G85-023 Isochromes for Maximum Endurance Horizontal Gliding Flight. Jeng-Shing Chern, *Chung Shan Institute of Science and Technology* (8, 1, p. 148) Engineering Note

G85-024 Stability Analysis of Gyroscopic Systems by Matrix Methods. D. J. Inman, *State University of New York at Buffalo*; and F. Saggio III, *Lear Siegler* (8, 1, p. 150) Engineering Note based on AIAA Paper 83-2286 CP836

G85-025 Model Reduction of Control Systems. L. R. Pujara, *Wright State University* (8, 1, p. 152) Engineering Note

G85-026 Optimal Many-Revolution Orbit Transfer. William E. Wiesel, *Air Force Institute of Technology, Wright-Patterson AFB*; and Salvatore Alfano, *U. S. Air Force Academy* (8, 1, p. 155) Engineering Note

G85-027 The Number of Multiplications Required to Chain Coordinate Transformations. V. N. Dvornychenko, *South Pasadena, California* (8, 1, p. 157) Engineering Note

G85-028 To Pursue or to Evade - That is the Question. A. W. Merz, *Lockheed Palo Alto Research Laboratory* (8, 2, p. 161) Article

G85-029 Nonconservative Evaluation of Uniform Stability Margins of Multivariable Feedback Systems. Hsi-Han Yeh, D. Brett Ridgely and Siva S. Banda, *Flight Dynamics Laboratory, Wright-Patterson Air Force Base* (8, 2, p. 167) Article based on AIAA Paper 84-1939 CP848

G85-030 The Enigma of False Bias Detection in a Strapdown System During Transfer Alignment. I. Y. Bar-Itzhack, *Technion-Israel Institute of Technology*; and Y. Vitek, *Ministry of Defense (Israel)* (8, 2, p. 175) Article

G85-031 A Design Methodology for Pitch Pointing Flight Control Systems. K. M. Sobel and E. Y. Shapiro, *Lockheed California Company* (8, 2, p. 181) Article

G85-032 Design and Flight Testing of Digital Direct Side-Force Control Laws. Scott L. Grunwald and Robert F. Stengel, *Princeton University* (8, 2, p. 188) Article based on AIAA Paper 85-1521

G85-033 Modal Analysis of Flexible Aircraft Dynamics with Handling Qualities Implications. David K. Schmidt, *Purdue University* (8, 2, p. 194) Article based on AIAA Paper 83-2074

G85-034 A Visual Cueing Model for Terrain-Following Applications. Greg L. Zacharias and Alper K. Caglayan, *Charles River Analytics, Inc.*; and John B. Sinacori, *John B. Sinacori Associates* (8, 2, p. 201) Article based on AIAA Paper 30300

G85-035 Poles and Transmission Zeros of Flexible Spacecraft Control Systems. Takashi Kida and Yoshiaki Ohkami, *National Aerospace Laboratory (Japan)*; and Shigeo Sambongi, *National Space Development Agency (Japan)* (8, 2, p. 208) Article

G85-036 Flexural Vibration of Gravity-Stabilized, Structurally Damped, Large Flexible Satellites. Shashi K. Shrivastava and Prashanta K. Maharana, *Indian Institute of Science* (8, 2, p. 214) Article

G85-037 Adaptive Modal Control of Structural Dynamic Systems Using Recursive Lattice Filters. N. Sundararajan, J. P. Williams and R. C. Montgomery, *NASA Langley Research Center* (8, 2, p. 223) Article based on AIAA Paper 83-2245 CP836

G85-038 Shuttle-Tethered Subsatellite System Stability with a Flexible Massive Tether. P. M. Bainum, C. M. Diarra and V. K. Kumar, *Howard University* (8, 2, p. 230) Article

G85-039 Formationkeeping for a Pair of Satellites in a Circular Orbit. Richard H. Vassar and Richard B. Sherwood, *TRW* (8, 2, p. 235) Article

G85-040 Application of the Delta-Rho Perturbation Method to Autonomous Orbit Computation. Alan M. Schneider, *University of California at San Diego*; and Brian D. Trexel, *M/A COM LINKABIT* (8, 2, p. 243) Article

G85-041 An Investigation of Correlation Region in Maneuvering Multi-Target Tracking. Hongren Zhou and K. S. P. Kumar, *University of Minnesota* (8, 2, p. 249) Article

G85-042 Digital Homing Guidance--Stability vs Performance Tradeoffs. F. William Nesline Jr. and Paul Zarchan, *Raytheon Company* (8, 2, p. 255) Article based on AIAA Paper 83-2167 CP836

G85-043 Estimation of the Time-to-Go Parameter for Air-to-Air Missiles. Gordon K. F. Lee, *Colorado State University* (8, 2, p. 262) Article

G85-044 Status and Concerns for Bank-to-Turn Control of Tactical Missiles. A. Arrow, *The Johns Hopkins University* (8, 2, p. 267) Article based on AIAA Paper 83-2198 CP836

G85-045 Least Acceleration Motion for Given Terminal Conditions. Vibeke Raae, *University of Trondheim (Norway)* (8, 2, p. 275) Engineering Note

G85-046 Separation of Time Scales in Aircraft Trajectory Optimization. M. D. Ardema, *NASA Ames Research Center*; and N. Rajan, *Stanford University* (8, 2, p. 275) Engineering Note based on AIAA Paper 83-2136 CP836

G85-047 Optimal Finite Horizon Approximation of Unstable Linear Systems. A.-M. Guillaume, *Universite Catholique de Louvain*; and P. T. Kabamba, *University of Michigan* (8, 2, p. 278) Engineering Note based on AIAA Paper 70400

G85-048 Angular Motion Influence on Re-entry Vehicle Ablation or Erosion Asymmetry Formation. D. H. Platus, *The Aerospace Corporation* (8, 2, p. 280) Engineering Note based on AIAA Paper 40100

G85-049 Measurements of Despin and Yawing Moments Produced by a Viscous Liquid. Miles C. Miller, *Chemical Research and Development Center, U. S. Army, AMCCOM* (8, 2, p. 282) Engineering Note

G85-050 Computerized Generation of Symbolic Equations of Motion for Spacecraft. Edwin J. Kreuzer and Werner O. Schiehlen, *University of Stuttgart* (8, 2, p. 284) Engineering Note based on AIAA Paper 83-302

G85-051 A Relation Between Liquid Roll Moment and Liquid Side Moment. Charles H. Murphy, *Ballistic Research Laboratory* (8, 2, p. 287) Engineering Note

G85-052 Development of the F/A-18A Automatic Carrier Landing System. J. M. Urnes and R. K. Hess, *McDonnell Aircraft Company* (8, 3, p. 289) Article based on AIAA Paper 83-2162 CP836

G85-053 Mixing Four-Dimensional Equipped and Unequipped Aircraft in the Terminal Area. L. Tobias, H. Erzberger and H. Q. Lee, *NASA Ames Research Center*; and P. J. O'Brien, *FAA Technical Center* (8, 3, p. 296) Article

G85-054 Active Flutter Suppression Using Eigenspace and Linear Quadratic Design Techniques. William L. Garrard and Bradley S. Liebst, *University of Minnesota* (8, 3, p. 304) Article

G85-055 Optimal Symmetric Flight with an Intermediate Vehicle Model. P. K. A. Menon, H. J. Kelley and E. M. Cliff, *Virginia Polytechnic Institute and State University* (8, 3, p. 312) Article based on AIAA Paper 83-2238 CP836

G85-056 Onboard Near-Optimal Climb-Dash Energy Management. Alan Weston and Gene Cliff, *Virginia Polytechnic Institute and State University*; and Henry Kelley, *Virginia Polytechnic Institute and State Unviersity* (8, 3, p. 320) Article

G85-057 Eccentric Two-Target Model for Qualitative Air Combat Game Analysis. A. Davidovitz and J. Shinar, *Technion-Israel Institute of Technology* (8, 3, p. 325) Article based on AIAA Paper 83-2122

G85-058 A Nonlinear Pilot Model for Hover. Dominick Andrisani II and Ching-Fu Gau, *Purdue University* (8, 3, p. 332) Article based on AIAA Paper 83-2232 CP836

G85-059 Flight Analysis for a Two-Stage Launch Vehicle with a Glideback Booster. J. Chris Naftel and Richard W. Powell, *NASA Langley Research Center* (8, 3, p. 340) Article based on AIAA Paper 83-2112

G85-060 Dynamics and Control of a Shuttle-Attached Antenna Experiment. Shyh Jong Wang, Yu Hwan Lin and Che-Hang Charles Ih, *Jet Propulsion Laboratory, California Institute of Technology* (8, 3, p. 344) Article based on AIAA Paper 83-2227 CP836

G85-061 Moment Induced by Liquid Payload During Spin-up Without a Critical Layer. Charles H. Murphy, *U. S. Army Ballistic Research Laboratory, Aberdeen Proving Ground* (8, 3, p. 354) Article based on AIAA Paper 84-0229

G85-062 Quaternion Feedback for Spacecraft Large Angle Maneuvers. Bong Wie and Peter M. Barba, *Ford Aerospace & Communications Corporation* (8, 3, p. 360) Article based on AIAA Paper 84-1032 CP844

G85-063 Modal-Space Active Damping of a Plane Grid: Experiment and Theory. Hallauer Wm. L. Jr., Gary R. Skidmore and Russell N. Gehling, *Virginia Polytechnic Institute and State University* (8, 3, p. 366) Article based on AIAA Paper 84-1018 CP844

G85-064 Development of Dynamics and Control Simulation of Large Flexible Space Systems. J. Y. L. Ho and D. R. Herber, *Lockheed Missiles and Space Company* (8, 3, p. 374) Article based on AIAA Paper 82-1564 CP825

G85-065 Error Analyses for the Delivery of a Spinning Probe to Jupiter. Gerald R. Hintz and James M. Longuski, *Jet Propulsion Laboratory, California Institute of Technology* (8, 3, p. 384) Article based on AIAA Paper 70400

G85-066 Preliminary Orbit Determination by a Composite Multivariate Search Strategy. B. V. Sheela and R. S. Bhat, *ISRO Satellite Centre (India)* (8, 3, p. 391) Article

G85-067 Use of Frequency Dependence in Linear Quadratic Control Problems to Frequency-Shape Robustness. B. D. O. Anderson *Australian National University*; and D. L. Mingori, *University of California, Los Angeles* (8, 3, p. 397) Article

G85-068 A New Guidance Law for Homing Missiles. Y. S. Kim and H. S. Cho, *The Korea Advanced Institute of Science and Technology*; and Z. Bien, *The Korea Advanced Institute of Scince and Technology* (8, 3, p. 402) Article

G85-069 Inclination Correction for Geostationary Orbits Using Ion Thrusters. Shantha P. Kumar, P. Kudva and P. S. Goel, *ISRO Satellite Centre (India)* (8, 3, p. 405) Engineering Note

G85-070 Trajectory Reconstruction During Thrusting Phase of Rockets Using Differential Corrections. D. R. Manohar, *Vikram Sarabhai Space Centre*; and S. Krishnan, *Indian Institute of Technology* (8, 3, p. 406) Engineering Note

G85-071 Optimal Controller for Homing Missile. William R. Yueh, *Northrup Electronics Division*; and Ching-Fang Lin, *Boeing Military Airplane Company* (8, 3, p. 408) Engineering Note

G85-072 Reliability Considerations in the Placement of Control System Components. Raymond C. Montgomery, *NASA Langley Research Center*; and Wallace E. Vander Velde, *Massachusetts Institute of Technology* (8, 3, p. 411) Engineering Note based on AIAA Paper 83-2260 CP836

G85-073 Subaliases in the Frequency Response of Digitally Controlled Systems. Hsi-Han Yeh, *University of Kentucky* (8, 3, p. 413) Engineering Note

G85-074 New Concepts in Control Theory, 1959-1984. Arthur E. Bryson Jr., *Stanford University* (8, 4, p. 417) Lecture based on AIAA Paper 84-0161

G85-075 Use of Multiple Inertial Systems to Correct for the Effects of Gravitational Anomalies. Jack Richman, *The Singer Company* (8, 4, p. 426) Article based on AIAA Paper 83-2196 CP836

G85-076 Strapdown Inertial Navigation System Requirements Imposed by Synthetic Aperture Radar. James L. Farrell, *Westinghouse Defense and Electronic Systems Center* (8, 4, p. 433) Article

G85-077 Toward a Unifying Theory for Aircraft Handling Qualities. Ronald A. Hess and Iwan Sunyoto, *University of California, Davis* (8, 4, p. 440) Article based on AIAA Paper 84-0236

G85-078 Roll/Yaw Control of a Flexible Spacecraft Using Skewed Bias Momentum Wheels. Bong Wie, John A. Lehner and Carl T. Plescia, *Ford Aerospace & Communications Corporation* (8, 4, p. 447) Article based on AIAA Paper 84-1962 CP848

G85-079 Space Structure Control Design by Variance Assignment. Robert E. Skelton, *Purdue University*; and Michael DeLorenzo, *U. S. Air Force Academy* (8, 4, p. 454) Article

G85-080 Identification of Vibrating Flexible Structures. S. Rajaram and J. L. Junkins, *Virginia Polytechnic Institute and State University* (8, 4, p. 463) Article

G85-081 Attitude Dynamics of a Rotating Chain of Rigid Bodies in a Gravitational Field. Hari B. Hablani, *Rockwell International* (8, 4, p. 471) Article

G85-082 Low Earth Orbit Navigation in the Tracking and Data Acquisition System Era. Bryant D. Elrod, *Stanford Telecommunications, Inc.* (8, 4, p. 478) Article based on AIAA Paper 84-0320

G85-083 Minimum Energy-Loss Guidance for Aeroassisted Orbital Plane Change. D. G. Hull, J. M. Giltner, J. L. Speyer and J. Mapar, *University of Texas at Austin* (8, 4, p. 487) Article based on AIAA Paper 84-1825 CP848

G85-084 Maximum-Information Guidance for Homing Missiles. D. G. Hull and J. L. Speyer, *University of Texas at Austin*; and C. Y. Tseng, *Chung Shan Institute of Science and Technology, Taiwan* (8, 4, p. 494) Article based on AIAA Paper 84-1887 CP848

G85-085 Robust Missile Autopilot Design Using a Generalized Singular Optimal Control Technique. Ching-Fang Lin, *Boeing Company, Seattle*; and Szu Pin Lee, *Litton Guidance and Control Land Vehicle System* (8, 4, p. 498) Article based on AIAA Paper 84-1847 CP848

G85-086 A Missile Duel Between Two Aircraft. Bernt Jarmark, *Saab-Scania, Sweden* (8, 4, p. 508) Article

G85-087 A Multiloop Robust Controller Design Study Using Singular Value Gradients. Jerry R. Newsom, *NASA Langley Research Center*; and V. Mukhopadhyay, *George Washington University Joint Institute for Advancement of Flight Sciences* (8, 4, p. 514) Article based on AIAA Paper 83-2191 CP836

G85-088 Time-Domain Stability Robustness Measures for Linear Regulators. Rama Krishna Yedavalli, *Stevens Institute of Technology*; Siva S. Banda and D. Brett Ridgely, *Wright Patterson Air Force Base* (8, 4, p. 520) Article

G85-089 Applications of Nonlinear Programming for Automated Multivariable Control System Design. Gary W. Machles and Francis D. Hauser, *Boeing Aerospace Company* (8, 4, p. 525) Article based on AIAA Paper 83-2275 CP836

G85-090 Aerodynamic Requirements at the Indianapolis Motor Speedway. L. Daniel Metz, *University of Illinois at Urbana-Champaign* (8, 4, p. 530) Engineering Note

G85-091 Slow and Fast State Variables for Three-Dimensional Flight Dynamics. M. Ardema, *NASA Ames Research Center*; and N. Rajan, *Stanford University* (8, 4, p. 532) Engineering Note

G85-092 An Analytical Approach to Geosynchronous Acquisition. Charles F. Gartrell, *General Research Corporation* (8, 4, p. 535) Engineering Note

G85-093 Equations of Attitude Motion for an N-Body Satellite with Moving Joints. B. A. Conway, *University of Illinois at Urbana-Champaign*; and J. W. Widhalm, *University of Illinois at Urbana Champaign* (8, 4, p. 537) Engineering Note

G85-094 Analytic Fourier Transform for a Class of Finite-Time Control Problems. James D. Turner, *Cambridge Research*; and Hon M. Chun, *The Charles Stark Draper Laboratory, Inc.* (8, 4, p. 539) Engineering Note

G85-095 A Robust Compensator Design by Frequency-Shaped Estimation. J. A. Bossi, *University of Washington* (8, 4, p. 541) Engineering Note based on AIAA Paper 84-1927 CP848

G85-096 Predictor Laws for Pictorial Flight Displays. Arthur J. Grunwald, *Technion--Israel Institute of Technology* (8, 5, p. 545) Article

G85-097 Analysis of Aircraft Control Strategies for Microburst Encounter. Mark L. Psiaki and Robert F. Stengel, *Princeton University* (8, 5, p. 553) Article based on AIAA Paper 84-0238

G85-098 Star-Sensor-Based Satellite Attitude/Attitude Rate Estimator. Eliezer Gai, *The Charles Stark Draper Laboratory, Inc.*; Kevin Daly, *The Charles Stark Draper Laboraory, Inc.*; James Harrison, *The Charles Stark Laboratory, Inc.*; and Linda Lemos, *The Charles Stark Draper Laboratory, Inc.* (8, 5, p. 560) Article

G85-099 Thrust Vector Control Design for a Liquid Upper Stage Spacecraft. Bong Wie, *Ford Aerospace & Communications Corporation* (8, 5, p. 566) Article based on AIAA Paper 85-1914 CP856

G85-100 Attitude Stability of an Orbiting Gyrostat in Conical Equlibrium. P. C. Hughes, *University of Toronto* (8, 5, p. 573) Article

G85-101 Stability of Multidimensional Linear Time-Varying Systems. Shashi K. Shrivastava and S. Pradeep, *Indian Institute of Science* (8, 5, p. 579) Article based on AIAA Paper 84-1954 CP848

G85-102 Dynamics of Flexible Bodies in Tree Topology--A Computer-Oriented Approach. Ramendra P. Singh and Richard J. VanderVoort, *Honeywell Incorporated*; and Peter W. Likins, *Lehigh University* (8, 5, p. 584) Article based on AIAA Paper 84-1024 CP844

G85-103 Dynamics and Control of Orbiting Flexible Structures Exposed to Solar Radiation. R. Krishna and P. M. Bainum, *Howard University* (8, 5, p. 591) Article

G85-104 Experimental Research on Flexible Beam Modal Control. Bernd E. Schafer and Hans Holzach, *German Aerospace Research Establishment (DFVLR)* (8, 5, p. 597) Article based on AIAA Paper 84-1020 CP844

G85-105 Distributed Piezoelectric-Polymer Active Vibration Control of a Cantilever Beam. Thomas Bailey and James E. Hubbard Jr., *Massachusetts Institute of Technology* (8, 5, p. 605) Article

G85-106 Dynamics and Control of Lattice Beams Using Simplified Finite Element Models. D. T. Berry, T. Y. Yang and R. E. Skelton, *Purdue University* (8, 5, p. 612) Article based on AIAA Paper 84-1043 CP844

G85-107 An Eigensystem Realization Algorithm for Modal Parameter Identification and Model Reduction. Jer-Nan Juang and Richard S. Pappa, *NASA Langley Research Center* (8, 5, p. 620) Article

G85-108 Characteristic Elastic Systems of Time-Limited Optimal Maneuvers. Arthur L. Hale, *Univeristy of Illinois at Urbana-Champaign*; and Ronald J. Lisowski, *University of Illinois at Urbana-Champaign* (8, 5, p. 628) Article

G85-109 Application of a New Multivariable Model-Following Method to Decoupled Flight Control. Kimio Kanai and Shigeru Uchikado, *The National Defense Academy (Japan)*; Peter N. Nikiforuk and Noriyuki Hori, *University of Saskatchewan* (8, 5, p. 637) Article

G85-110 Design of Robust Digital Controllers for Gas Turbines with Actuator and Sensor Dynamics. B. Porter and T. Manganas, *University of Salford (England)* (8, 5, p. 644) Article based on AIAA Paper 84-1185

G85-111 Minimum-Fuel, Three-Dimensional Flight Paths for Jet Transports. Frank Neuman, *NASA Ames Research Center*; and Eliezer Kreindler, *Israel Institute of Technology* (8, 5, p. 650) Article

G85-112 Optimal Catapult Impulse Shaping for Ejection Seats. P. K. A. Menon and R. A. Walker, *Integrated Systems Inc.* (8, 5, p. 658) Engineering Note based on AIAA Paper 84-1895 CP848

G85-113 Absolute Stability of Symmetric Highly Maneuverable Missiles. M. Guelman, *Rafael, Ministry of Defense (Israel)* (8, 5, p. 660) Engineering Note

G85-114 Miss Distance of Proportional Navigation Missile with Varying Velocity. W. R. Chadwick, *Naval Surface Weapons Center* (8, 5, p. 662) Engineering Note

G85-115 Guidance Performance Analysis with In-Flight Radome Error Calibration. William R. Yueh, *Northrop Electronics Division*; and Ching-Fang Lin, *Boeing Company* (8, 5, p. 666) Engineering Note

G85-116 Controllability and Observability of General Linear Lumped-Parameter Systems. Mehdi Ahmadian, *Clemson University* (8, 5, p. 669) Engineering Note

G85-117 Sensor Failure Detection for Jet Engines Using Analytical Redundancy. Walter C. Merrill, *NASA Lewis Research Center* (8, 6, p. 673) Survey Paper based on AIAA Paper 84-1452

G85-118 Effects of Payload Motions on the Nutational Stability of the Galileo Spacecraft. Guy K. Man and Fidelis O. Eke, *Jet Propulsion Laboratory, California Institute of Technology* (8, 6, p. 683) Article based on AIAA Paper 84-1992

G85-119 Longitudinal Vibration of Gravity-Stabilized, Large, Damped Spacecraft Modeled as Elastic Continua. Shashi K. Shrivastava and Prashanta K. Maharana, *Indian Institute of Science* (8, 6, p. 689) Article based on AIAA Paper 84-2004

G85-120 Eigenvalue Optimization Algorithms for Structure/Controller Design Iterations. D. S. Bodden, *Virginia Polytechnic Institute and State University*; and J. L. Junkins, *Texas A&M University* (8, 6, p. 697) Article

G85-121 The Implementation of Modal Filters for Control of Structures. L. Meirovitch and H. Baruh, *Virginia Polytechnic Institute and State University* (8, 6, p. 707) Article

G85-122 Robust Natural Control of Distributed Systems. H. Baruh, *Rutgers University*; and L. Silverberg, *North Carolina State University* (8, 6, p. 717) Article

G85-123 Three- and Four-Satellite Continuous-Coverage Constellations. John E. Draim, *ANSER (Analytical Services Inc.)* (8, 6, p. 725) Article based on AIAA Paper 84-1996

G85-124 Two-Time Scale Stabilization of Systems with Output Feedback. Daniel D. Moerder, *Information and Control Systems, Inc.*; and Anthony J. Calise, *Drexel University* (8, 6, p. 731) Article based on AIAA Paper 84-1933 CP848

G85-125 Optimal Magnetic Bearing Control for High-Speed Momentum Wheels. Thomas Lange, *Deutsche Forschungs- und Versuchsanstalt fuer Luft- und Raumfahrt e. V.* (8, 6, p. 737) Article

G85-126 Longitudinal Stability of a Hovering, Tethered Rotorcraft. D. C. Rye, *The University of Sydney* (8, 6, p. 743) Article

G85-127 Stability and Control of VTOL Capable Airships in Hovering Flight. H. C. Curtiss Jr. and V. Sumantran, *Princeton University* (8, 6, p. 753) Article based on AIAA Paper 83-1987 CP835

G85-128 Ground-Simulation Investigation of VTOL Airworthiness Criteria for Terminal Area Operations. J. V. Lebacqz, *NASA Ames Research Center*; and B. C. Scott, *Federal Aviation Administration* (8, 6, p. 761) Article based on AIAA Paper 84-2105 CP849

G85-129 Normalized Predictive Deconvolution: A Time Series Algorithm for Modeling Human Operator Dynamics. Daniel J. Biezad, *Air Force Institute of Technology*; and David K. Schmidt, *Purdue University* (8, 6, p. 768) Article

G85-130 Selection of an Optimal Cost Index for Airline Hub Operation. Abhijit Chakravarty, *Boeing Commercial Airplane Company* (8, 6, p. 777) Article based on AIAA Paper 84-1859 CP848

G85-131 Collaborative Techniques in Modal Analysis. M. L. Amirouche, *University of Illinois at Chicago*; and R. L. Huston, *University of Cincinnati* (8, 6, p. 782) Engineering Note based on AIAA Paper 85-0632 CP851

G85-132 Reducing the Effects of Model Reduction due to Parameter Variations. J. M. Lin, *National Chiao-Tung University*; and K. W. Han, *Chung-Shan Institute of Science and Technology* (8, 6, p. 785) Engineering Note

G85-133 A New Algorithm for the Computation of the Geodetic Coordinates as a Function of Earth-Centered Earth-Fixed Coordinates. Lawrence O. Lupash, *Intermetrics Inc.* (8, 6, p. 787) Engineering Note
